- Corona Plus for Extrusion - Blown Film Lines
- Corona Plus for High Speed Coating Lines
- Corona Treater for Printing
- High Efficient Corona Treater for Labels
- Corona Plus for Laminating
- EASI-Plasma Treatment

Find the smallest defects at full production speed to improve quality and reduce waste with Unilux LED Stroboscopic Inspection.

- ✓ New LED Strobes are 2x brighter than Xenon with added environmental benefit & lower operating costs
- ✓ Handheld Strobes for spot-checks and troubleshooting anywhere on the line
- ✓ Fixed Mount Strobes for surface and print inspection up to 12 meters wide
- ✓ UV Strobes for the inspection of ink and varnish with optical brighteners
- ✓ Smart Assist LED Strobes for Surface and Edge Inspection in the Metals Industries

Tension Control – Telemetry Systems – Web Guiding

- ⚡ Force Sensors/Load Cells
- ⚡ Industry Leading Technology and Innovation
- ⚡ Tension Indicators & Amplifiers
- ⚡ Web Guiding Systems
- ⚡ Industry Highest Overload Capacity
- ⚡ Ethernet/IP/PROFINET Communication Systems
- ⚡ Closed-Loop Tension Controllers
- ⚡ Closed-Loop Brake Control

Northline Industrial Control Repair Services - A Cost Effective Solution

Northline helps you reduce your overall maintenance costs by having your industrial electronic controls repaired at a fraction of the replacement/new costs. **Northline's** standard repair service includes a *Free Technical Evaluation – prior to quote*, and a **One Year In-Service Warranty. Free Pick-up available! We do CRT to LCD conversions too!**

Graymills offers the widest range of ink & coating pumps - centrifugal, peristaltic, and double diaphragm. Whether you are wide-web, mid-web, narrow web, envelope or corrugated, you'll find a pump, filter, tank, or total system that fits your needs.

Web cleaning, Sheet cleaning, surface dedusting and slitting dust removal, static neutralizing systems such as electrostatic discharging AC and electrostatic discharging TRUE DC as well as electrostatic charging and measuring systems.

Roll-2-Roll Technologies LLC - The most advanced sensor and control technology for web guiding and web monitoring in the industry. This technology allows converters to process any web material without the need of calibration. Roll-2-Roll Technologies also has retrofit or upgrade kits available. These kits replace the control, sensor and actuator, but use existing web guide frames and mechanical parts to give converters an economical option to deal with old, obsolete or troublesome guiding systems.
