

Mitsubishi MR-HXXX-AN Series AC Servo Amplifiers

Automation Repair and Sales

Electronics
Robotics
Servo motors
Spindle Motors
CNC
HMI / Displays
Operator Stations
Monitors
PLCs
Light Curtains
Inverter Drives
AC/DC Drives
Welders
Process Controls

Capabilities Include:

MR-HXXX-AN

Northline Industrial is pleased to announce the repair capability for the Mitsubishi MR-HXXX-AN servo amplifiers. The MR-H's servo settling time has been sharply reduced when compared to conventional servo systems. The ability of the MR-H to respond quickly and precisely to a reference change is due to the high-performance. The MR-H has the most stable performance at low speed in its class of devices. This is made possible through the application of a high-resolution serial encoder and the model-reference adaptive control theory. This low speed performance makes the MR-H well suited for low speed machining operations.
